

Pre-IMTS 2026 SPECIAL

SHIMADA-KITAKO

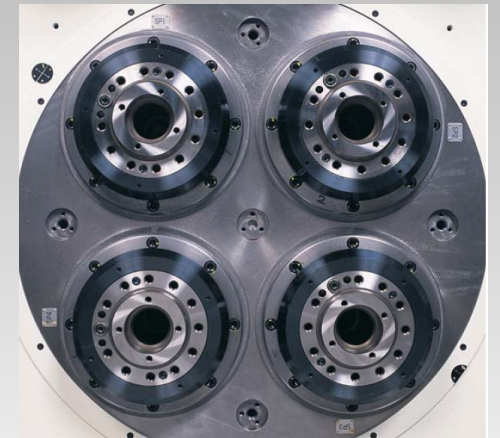

VT4-350

MULTI SPINDLE CNC LATHE

- The newest version of the uniquely designed 4-spindle lathe (two spindles are simultaneously machining while the other two spindles are being loaded or unloaded).
- Part loading/unloading time can literally become close to ZERO.
- By increasing the rapid feed rate on each axis, idling time of the machine has become minimal, and the actual efficiency has been drastically improved.
- Built-in, ultra high-speed part loading system is on the machine.
- Variety of machine layouts, and many different options, can be offered to meet your different requirements for a line layout.

Show machine include following options:

- ▶ 4 pcs. Of 3-jaw chuck
- ▶ High pressure coolant pump
- ▶ Fanuc LR-Mate 200iD
- ▶ Tool holders
